# AESTHETIC PROCEDURES

## **Anti Wrinkle Injections (Botulinum Toxin) for Line Smoothing.**

One of the most popular treatment for facial lines and wrinkles in the UK.

The treatment is a simple, non-surgical procedure that smoothes persistent lines between your eyebrows, on your forehead and on your outer eye area (crow's feet). I like to call it a 'turn back the clock' treatment.

A treatment session consists of a few tiny needle pricks that relax the muscles that caused those lines to form.
